POWER

JOHN THOMPSON UTILITIES

Provides comprehensive solutions for utility plants, specialising in the maintenance, repairs and retrofit of utility plant boilers, ESP systems, FFP systems, mills, burners, ducting, HP piping and ancillary equipment – geared towards keeping large power plants operating optimally, as well as offer plant and equipment hire solution for construction work. Our expertise includes welding high-performance alloys for high-temperature, high-pressure applications, including the nuclear power industry as well as industrial air quality solutions such as HVAC systems, bag filters and scrubbers.

JOHN THOMPSON INDUSTRIAL

Leader in energy and environmental solutions driven by value engineering and innovation. With a strong focus on serving both local and international markets, we offer comprehensive solutions designed to optimise performance, reduce environmental impact and drive operations efficiency. Our expertise encompasses the design, engineering, manufacture, construction, repairs, maintenance, retrofit, installation and commissioning of industrial water-tube and packaged fire-tube boilers. The fabrication facility covers a total under roof floor area of 30 000sqm.

Through the Energy Management business unit, John Thompson Industrial also offers outsourced steam services. In addition, we provide capacity and efficiency improvements to older boilers, the supply of original equipment manufacturer (OEM) spares, reliability studies, metallurgical services and advanced computational fluid design (CFD) modelling.

ENGINEERING PROJECTS AND CONTRACTS

INDUSTRY

Mine winder experts with modern power electronic drive, control and switchgear technology, providing turnkey solutions worldwide for specialized industrial rotating drive and power applications in mining, metals, paper and process industries. The business also supplies fire detection systems for explosive atmospheres, consisting of Air Velocity Detectors, Methane Detectors, Smoke Detectors and Carbon Monoxide Detectors.

We manage projects from design to commission, inspect and maintain, provide emergency support, do repairs and perform magnetic rope testing.

32 12th Road, Kew, Johannesburg, 2090
Tel: (011) 430-8700

epc.industry@actom.co.za

CONTRACTING

Electrical and Control & Instrumentation business that provides procurement, construction and contract management solutions for electrical power cabling and C&I in infrastructure projects across various sectors.

32 12th Road, Kew, Johannesburg, 2090
Tel: (011) 430-8700

epc.contracting@actom.co.za

POWER SYSTEMS

Provides turnkey solutions in the electrical infrastructure sector specializing in substation construction and renewable electrical balance of plant installations.

32 12th Road, Kew, Johannesburg, 2090
Tel: (011) 430-8700

epc.powersystems@actom.co.za

RAIL TRANSPORT

The business has a comprehensive turnkey capability comprising design, manufacture, installation and maintenance in the fields of railway automation, signalling, C&I systems and traction equipment systems and components.

We are also a contractor and supplier of railway rolling stock equipment, parts, maintenance services and specialized depot assembly machinery and test equipment.

Cnr. Alpha & Branch Roads, Driehoek, 1401
Tel: (011) 871-6600

epc.tep@actom.co.za

KOEBEC ELECTRICAL AND ENGINEERING SERVICES

Provider of high, medium and low voltage installations and modifications, project management and commissioning for the Nuclear, Explosive and Petro-chemical industries.

Tel: (021) 553-2155

koebec@iafrica.com

bmorgan@koebec.co.za

HIGH VOLTAGE EQUIPMENT

High & medium voltage circuit breakers, HV hybrid compact switchgear, HV gas insulated switchgear, instrument transformers, surge arresters, insulators, isolators, line traps in the voltage range 11kV - 765kV, mobile and modular substations and isolated phase busbars. Installation, maintenance and repairs of high voltage equipment up to 765kV
2 Magnet Road, Knights, 1413
Tel: (011) 820-5349

hve.sales@actom.co.za

MEDIUM VOLTAGE SWITCHGEAR

MV SWITCHGEAR

Leading manufacturer and supplier of air-insulated (AIS), gas-insulated (GIS) and solid dielectric-insulated (SIS) switchgear rated up to 36kV and 50kA. Our product range includes indoor metal-enclosed switchgear, containerized switchgear solutions, vacuum interrupters, compact prefabricated substations for renewable energy applications, miniature substations (minisubs), outdoor free-standing non-extensible and extensible ring main units and bulk metering units (BMU's) and retrofit switchgear solutions. Our services include accredited training and the maintenance, repair, and refurbishment of switchgear.

POWER TRANSFORMERS

ACTOM Power Transformers (APT) operates two advanced manufacturing facilities in South Africa, each with a strong legacy of excellence in transformer production.

The Wadeville facility boasts over 60 years of manufacturing experience, producing transformers ranging from 2MVA to 315 MVA, with voltage capabilities of up to 275kV.

The Pretoria facility, established in 1946, brings more than 80 years of expertise and is capable of manufacturing transformers from 2MVA up to 500MVA, with voltage ratings up to 400kV.

Together, these facilities position APT as a leading provider of high-capacity, high-voltage transformer solutions across a wide range of applications.

STATIC POWER

(Incorporating Alkaline Batteries and COM10)

Specialises in the design and manufacture of bespoke AC and DC standby equipment for the industrial, telecom's, rail and renewable energy markets. Our products include robust Thyristor type chargers including Micro Processor Controlled options, COM10 Switchmode Chargers and Converters, Industrial Batteries – Lead Acid, NiCd Lithium-ion and Sodium-ion options, Power Supplies, Industrial UPS's, Furnace Control Panels, AC and DC Distribution Boards and Battery Tripping Units. All systems are designed and engineered to suit their purpose for both the local and export markets. We also provide Turnkey Solutions for Renewable Energy requirements to the commercial, industrial and utility markets, which includes Solar PV, BESS and Diesel generator microgrids.
