## POWER

### JOHN THOMPSON UTILITIES

Provides comprehensive solutions for utility plants, specialising in the maintenance, repairs and retrofit of utility plant boilers, ESP systems, FFP systems, mills, burners, ducting, HP piping and ancillary equipment – geared towards keeping large power plants operating optimally, as well as offer plant and equipment hire solution for construction work. Our expertise includes welding high-performance alloys for high-temperature, high-pressure applications, including the nuclear power industry as well as industrial air quality solutions such as HVAC systems, bag filters and scrubbers.

### JOHN THOMPSON INDUSTRIAL

Leader in energy and environmental solutions driven by value engineering and innovation. With a strong focus on serving both local and international markets, we offer comprehensive solutions designed to optimise performance, reduce environmental impact and drive operations efficiency. Our expertise encompasses the design, engineering, manufacture, construction, repairs, maintenance, retrofit, installation and commissioning of industrial water-tube and packaged fire-tube boilers.

Through the Energy Management business unit, John Thompson Industrial also offers outsourced steam services. In addition, we provide capacity and efficiency improvements to older boilers, the supply of original equipment manufacturer (OEM) spares, reliability studies, metallurgical services and advanced computational fluid design (CFD) modelling.
